Laboratory Tasks 02

for

Web Programming

Spring 2024

FAST School of Computer Science

Lab Task 1:

Build Your Webpage having your name, roll number, and brief about yourself.

1. Style the background color to blue using inline CSS method.
2. Change the font size of the name text to 36px using Internal CSS.
3. Using external CSS methods give shadows to all elements.

Lab Task 2:

Demonstrate the following output using style on your webpage.

Lab Task 3:

Develop the following forms in to your webpage.

A registration form layout on a blue background. It consists of five white input fields stacked vertically, each with a label and an asterisk: "Name*", "Username*", "Password*", "Number*", and "Email Id*". Below these fields is a red rectangular button with the text "Register" in white, sans-serif font.

Lab Task 4:

Create the following card (Or like that) in your webpage.

Lab Task 5:

Animate your “Task3” form left to right while user load the page in first 5sec.

You are done with your exercise(s); make your submission on Classroom.
